

Poliambulatorio

The clinic Morana Salus offers a wide range of medical services and makes use of several collaborations with leading medical specialists in different medical areas: Allergy/Immunology, Anesthesia and Resuscitation, Cardiosurgery, Orthopedic Surgery, Thoracic Surgery, Diabetes and Replacement Disease, Endocrinology, Gynecology, Nephrology, Neurosurgery, Neurology, Oncology, Osteoporosis, Otolaryngology, Pediatrics, Pneumology, Psychology, Radiotherapy, Rheumatology.

The objective that MORANA SALUS srl has set itself with the investment program, financed by the EU through the PO FESR 2014/2020 Measure 3.5.1.1. contribution of 681.375,00, is the realization of n~ 2 surgical rooms, with furniture and equipped with modern diagnostic tools and therapeutic intervention.

The purchase of modern equipment allows to have two surgical rooms closely connected with the clinics realizing an integration in the same medical facility.

The realization of the investment was carried out according to the planning, allowing the reference territory to increase the equipment of state-of-the-art medical infrastructure.

In particular, the rooms have been built with modern equipment with a high content of technology, respect for privacy and high security standards.

Just to mention some of the equipment that make up the medical structure we cite: Set instrumentation for Urology, Set needles for Ophthalmology, Surgical Microscope, Stress test with treadmill, Holter cardiac with recorders Endoscopes flexible: Gastroscope and Colonoscope, Electrocardiograph with

accessories, Dermatoscope, Spirometer, Videotoscope, Operating Chair with Monitor,
Electrosurgical Anesthesia System

From the completion of the investment the forecasts of positive impact on the territory have been confirmed by the numerous performances carried out and by the satisfaction of the user. In particular, attendance is appreciated
